DETAILED ACTION

Reason for Allowance

1. Claims 1-7, 9-16, 18-20, and 23-42 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-7, 9-16, 18, 19, and 29-42 are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose the following italic limitations:

In claims 1, 11, 29, and 36, *the buffering the cell change logical link control packet data unit message into a link control packet data unit message transmit queue such that it is selected for transmission prior to any buffered packet data units that were present before the mobile station entered the new cell ...indicating to a radio link control/medium access control of the network if an ACK or an UNACK radio link control mode is to be used when transmitting the cell change packet data unit message* and in combination with other limitations recited as specified in claim 1, 11, 29, & 36, respectively.

Claims 20 and 23-26 are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose the following italic limitations:

In claim 20, *the in response to the mobile station making access in the second cell, sending a channel request that indicates a cell update operation; establishing an uplink temporary block flow for transferring logical link control packet data units from the mobile station to the network; in response to the network receiving an unknown temporary logical link identifier from the mobile station, sending a message to the*

serving general packet radio service support node; and based on the message, determining with the serving general packet radio service support node that the mobile station is located in the second cell and in combination with other limitations recited as specified in claim 20.

Claims 27 and 28 are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose the following italic limitations:

In claim 27, the cell change logical link control packet data unit message having a flag for indicating a priority of the packet data unit relative to other packet data units; ...storing the cell change logical link control packet data unit message into a logical link control packet data unit message transmit message queue in accordance with the indicated priority; ...indicating to a radio link control/medium access control of the network if an ACK or an UNACK radio link control mode is to be used when transmitting the cell change packet data unit message; and transmitting the stored cell change logical link control packet data unit to a radio channel before any stored packet data units having a lower priority and in combination with other limitations recited as specified in claim 27.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
